SUPPLEMENT

1. The Projektorneu Sawot. This is a factory making searchlights which is situated at the edge of the city of Moscow and can be reached by trolley number 2, stop Ilitsch Square. The factory consists of approximately 12 buildings of red brick; some of them have been covered with a coat of plaster. The searchlights and all the appertaining equipment and fixtures are made in this concern, from the smallest item up to the assembly work, with the exception of the carriages which are only mounted in this factory. The plant employs approximately 2,000 persons.
2. An Electro-Carbon and Soot Factory near the Station Kudinowo, 25 kilometers from Moscow in the direction of Noginsk, consisting of three buildings of red brick, situated to the left of the railroad. The factory makes soot for coal to be used for electro-motors. It also makes soot for the rubber industry.
3. To the right of the RR station Kudinowo lies the Elektro-Ugli factory (Electro-Carbon factory), consisting of five to six buildings of red brick. The factory makes electro-carbon, motor-carbon, searchlight-carbon, etc. for the power-plants.
4. A Carbolite Factory (synthetic horn, vulcanized india-rubber) which lies 60 kilometers from Moscow near the station Stolbojawa about four to five kilometers from the RR line. There are six buildings. The factory makes all kinds of consumer goods, such as casings for accumulators, steering wheels, for cars, knife blades, billard balls, etc.
5. Security Regulations. Any prospective employee has to fill out a questionnaire; some of the questions refer even to deceased family members. A sworn statement has to be signed, promising that full secrecy will be observed; it is also pointed out to the employee that the factory in question is essential to the war effort. The prospective employee has to have two sponsors; both must belong to the party and must have been affiliated with it for at least from three to five years. This is followed by an investigation by the MVD. The procedure takes about three months and only then will the person be hired. He has to sign an affidavit which directs him to observe strict secrecy; it is also pointed out to him that he and his nearest relatives will suffer the death penalty in case he should divulge any information.
